

GILBERT AMERICAN FLYER TRAINS

WORLD'S MOST COMPLETE LINE OF SCALE MODEL HOT SHOTS

DEVELOPED AT THE GILBERT HALL OF SCIENCE

Left to right—John Kane, engineer of New Haven's crack trains, "Len" Bennett, and A. C. Gilbert

"BOYS!

WHEN I SAY MY NEW AMERICAN FLYERS ARE SCALE MODELS, I MEAN THEY ARE MADE FROM ACTUAL RAILROAD BLUEPRINTS AND ARE FAITHFUL REPRODUCTIONS OF REAL TRAINS LIKE THE ONE YOU SEE HERE."

A.C. Gilbert

President The A. C. Gilbert Company and Founder of the Gilbert Hall of Science.

NOW — FOR THE FIRST TIME YOU CAN HAVE A SCALE MODEL TRAIN WITHOUT ASKING DAD TO PAY A PENNY EXTRA

The Gilbert Hall of Science presents the most spectacular and realistic fleet of scale model trains ever created at popular prices.

If you are the kind of boy who is not satisfied with "make-believe"—who wants the utmost in realism in electric railroading—then the new American Flyer trains will bring you the greatest thrill of your life. They are as different from ordinary trains as day is from night. Because they're genuine *scale models*. Now let's see exactly what that means.

As you know, all modern machines—automobiles, airplanes, trains, etc.—are built from blueprints. So—up in the great Gilbert Hall of Science we build American Flyer locomotives and cars from exactly the same blueprints that the manufacturers of real operating equipment use.

Here's how we do it. For every foot of real locomotive length, height or width, we make American Flyer trains $\frac{3}{16}$ of an inch. For example, suppose the real locomotive which we are reproducing is 48 feet long. Then we make our American Flyer locomotive $48" \times \frac{3}{16}"$ or $9"$ long. If the drive wheels are 6 feet high, the wheels of our model are made $6" \times \frac{3}{16}"$ or $1\frac{1}{8}"$ high.

Likewise, the headlight, the smokestack, the engineer's cab, the number and dimensions of the piston rods and other details are kept in correct proportions.

So faithfully and painstakingly are these

new American Flyer trains built to scale that if you take a photograph of one and compare it with a photograph of the same life-size train, you can scarcely tell which is which. Here is dramatic and conclusive proof that when you select an American Flyer scale model, you will enjoy miniature railroading in its most thrilling and spectacular form.

Here's another point—important to Dad as well as to you. Up to the present time scale model trains have been something that only wealthy people could afford. They might easily cost hundreds of dollars.

Today, the Gilbert Hall of Science has applied modern production methods to the building of scale model trains and equipment. As a result, you can buy them at a fraction of the price at which scale model trains are commonly sold. In fact, American Flyer scale model trains cost *no more* than ordinary trains not built to scale.

Be sure to study every picture and read every word in this booklet. See the actual trains and equipment at your local toy store. Take Dad along. He'll want an American Flyer as much as you. Tell your Uncles, Aunts, Grandparents what equipment you would like, so they can all join in giving you an American Flyer Merry Christmas.

WHY AMERICAN FLYER 3/16" SCALE MODELS OPERATING ON "O" GAUGE TRACK ARE MOST PRACTICAL FOR REALISTIC MINIATURE RAILROADING

WHY SCALE MODELS

● The accompanying three pictures explain at a glance what scale model means and why American Flyer scale models look so much more realistic than ordinary electric trains.

Here's a photograph of a real railroad baggage car.

WRONG — Not Scale Model

Here's a typical boy train passenger car. Notice how completely out of proportion it is, when compared with a real railroad car.

CORRECT — American Flyer Scale Model

Here's an American Flyer scale model baggage car. Compare this with the first photograph and you will see that length, height, width and other details are scaled true to life.

WHY 3/16" SCALE MODEL TRAINS FOR "O" GAUGE TRACK

● "O" Gauge track is by far the most popular track width both with boys and hobbyists. The chances are that is the size you now have or will get.

In order to have a realistic "O" Gauge railroad system, your locomotives and cars must not only be scale models, but in addition they must be built to the scale that operates in the most realistic way. That scale is 3/16"—which means that each 3/16" represents one foot of actual train measurements.

Extensive experiments conducted at the Gilbert Hall of Science prove that 3/16" scale is the ideal train scale for "O" Gauge track. Anything smaller looks too small. Anything larger looks unrealistic in going around curves. Also, on typical track layouts the train constantly jumps the track.

WRONG — Larger than 3/16" Scale Model Train on "O" Gauge Track

Notice how far the rear of the car juts out beyond the track in going around curves.

CORRECT — American Flyer 3/16" Scale Model on "O" Gauge Track

See how perfectly proportioned this train looks. No excess overhang of car beyond roadbed as train goes around curves.

WHY 40" DIAMETER FOR "O" GAUGE TRACK

● All American Flyer track is designed for a diameter of 40 inches. Thus you do not need big space in order to have a complete track system. Or, if you have plenty of room, 40" diameter track enables you to make double loop, figure 8 and other elaborate track layouts in no larger space than would be needed for a single track of larger diameter.

Right here is another important advantage of American Flyer 3/16" Scale Models. 3/16" scale models are the largest scale models that can be operated on 40" Diameter "O" Gauge track without risk of derailment every time they go around a curve.

WRONG — Larger than 3/16" Scale Model Train on 40" Diameter "O" Gauge Track

Train can be operated at slow speed only and is in constant danger of derailment.

CORRECT — American Flyer 3/16" Scale Model Train on 40" Diameter "O" Gauge Track

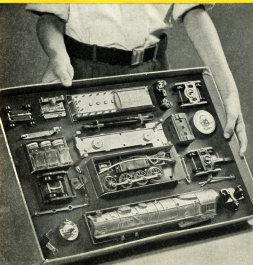

Highball it all you want. Even at top speeds, these modern hotshots cling to the rails.

LOOK — AMERICAN FLYER 3/16" SCALE MODELS ARE SO EXPERTLY DESIGNED THAT YOU CAN BUILD THEM WITH YOUR OWN HANDS

3 WAYS TO BUY AMERICAN FLYER 3/16" SCALE MODEL LOCOMOTIVES AND CARS—FOR "O" GAUGE TRACK

- 1 In Build-em-yourself KITS
- 2 Locomotives and Cars, Separately—Ready to Run
- 3 Complete Train Sets - including Track

Here's a 3/16" Scale Model Kit Just As You Get It.

Here You Are Getting a Big Kick Out Of Putting a Giant Locomotive Together.

Here—A Few Hours Later—Is Your Finished "Smoker" Ready to Hit the Main Iron.

THREE
FAMOUS LOCOMOTIVES
that you can build yourself
or Buy - Ready to Run -

3/16" Scale for "O" Gauge Track
All Die-Cast
Remote Directional Control

A New Fun Thrill in Electric Railroading

How would you like to build a giant locomotive yourself? Fit the powerful drive wheels under the long, gleaming boiler—assemble the Lucite electric headlight and other fascinating parts—then paint it and attach the decals. Yes, it's a thrilling experience to build your own locomotive and cars, and amazingly easy with American Flyer Build-'em-yourself kits.

Each kit contains all necessary parts, which are correctly machined, drilled and tapped. Paints, brush, decals and full instructions are also included. No special tools or skill are required to do an expert job.

They will be the glory of your railroad line—these American Flyer Scale Models that you assemble yourself. They look so realistic . . . they hustle over the rails with such realistic rhythm. Your friends will be amazed to learn that you built these authentic scale models yourself.

The fact that American Flyer 3/16" Scale Models can be purchased in Build-'em-yourself kits further proves how expertly they are designed and how faithfully the Gilbert Hall of Science follows real railroad engineering principles.

No matter which of these 3/16" Scale Models you select, nor how you buy them, you are sure of getting locomotives and rolling stock true to railroad blueprints.

If you want the extra fun of making your own, buy the Build-'em-yourself kits.

If you now have "O" Gauge track and want to add 3/16" Scale Model locomotives or cars as quickly as possible, you may prefer to buy those you need ready-to-run. All American Flyer 3/16" Scale Models operate on any standard "O" Gauge track.

If you are just starting an "O" Gauge system, a complete 3/16" Scale Model train set, including track, will probably appeal to you most.

No. 559 — PENNSYLVANIA LOCOMOTIVE AND TENDER — 17" LONG

An accurate die-cast 3/16" scale model of the famous 4-6-2 type Pennsylvania K-5 locomotive and tender. Remote directional control. Worm drive. Lucite electric headlight and jewel markers. Six powerful drive wheels with realistic gleaming eccentric arm triple action piston rods, side rods and connecting rods. Four wheel pony truck and two wheel booster. Die-cast tender is bunker type with imitation coal and has double trucks, 8 wheels. **Operates on A.C. only. See page 25.**

No. 559 LOCOMOTIVE AND TENDER — Completely Finished and Assembled.....\$17.50

No. 531 — N. Y. C. HUDSON LOCOMOTIVE AND TENDER — 18½" LONG

Not only is this locomotive an authentic die-cast 3/16" scale model of the great 4-6-4 Hudson type, but it also has all the most advanced American Flyer features: Remote directional control, worm drive, Lucite electric headlight and jewel markers. Six large drive wheels with realistic eccentric arm triple action piston rods, side rods and connecting rods. Four wheel pony truck and four wheel booster. Twelve wheel die-cast tender. **Operates on A.C. only. See page 25.**

No. 531 LOCOMOTIVE AND TENDER — Completely Finished and Assembled.....\$20.00

No. 534 — UNION PACIFIC LOCOMOTIVE AND TENDER — 21½" LONG

The 8 mighty drive wheels of this mammoth "battleship" suggest modern railroading super-power. Both locomotive and tender are die-cast and built to 3/16" scale from railroad blueprints. Locomotive is the 4-8-4 type. Tender is Union Pacific type with 12 wheels. Remote directional control—worm drive—Lucite electric headlight and jewel markers. Eight drive wheels with realistic eccentric arm triple action piston rods, side rods and connecting rods. **Operates on A.C. only. See page 25.**

No. 534 LOCOMOTIVE AND TENDER — Completely Finished and Assembled.....\$25.00

KIT FOR BUILDING No. 559 PENNSYLVANIA LOCOMOTIVE AND TENDER

Contains all parts for building 4-6-2 type Pennsylvania K-5. Armature, field, gears and drive wheels assembled to engine frame for speedy building. Remote directional control unit and positive action coupler on tender included. Instruction sheet gives full directions. **Operates on A.C. only. See page 25.**

**No. K-559 LOCOMOTIVE
AND TENDER KIT
\$12.50
Completely Boxed**

KIT FOR BUILDING No. 531 N. Y. C. LOCOMOTIVE AND TENDER

This kit and a few simple tools are all you need to build this great New York Central 4-6-4 yourself. Armature, field, gears and drive wheels come assembled to engine frame. Easy-to-follow instructions with every kit. **Operates on A.C. only. See page 25.**

**No. K-531 LOCOMOTIVE
AND TENDER KIT
\$15.00
Completely Boxed**

KIT FOR BUILDING No. 534 UNION PACIFIC LOCOMOTIVE AND TENDER

Big as this locomotive is, you can easily build it yourself the American Flyer way. Armature, field, gears and drive wheels correctly assembled to engine frame. Remote directional control unit, positive action coupler on tender and all other parts included. **Operates on A.C. only. See page 25.**

**No. K-534 LOCOMOTIVE
AND TENDER KIT
\$20.00
Completely Boxed**

3/16" SCALE DIE CAST ROLLING STOCK TO GIVE YOUR RAILROAD 100% REALISM

- Operated on any "O" Gauge Track of 40" diameter or larger

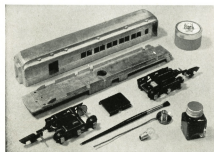

You can have a real railroad car workshop right in your home with these American Flyer car kits. Thanks to the fact that parts are die-cast, accurately scaled from railroad blueprints and manufactured with utmost precision, putting them together is fast and fascinating fun.

Or, if you prefer, you can buy any of the 9 cars shown on these pages completely assembled, ready to be attached to your train at once.

No matter which way you buy them, remember these cars are authentic, 3/16" scale models, designed to operate on any standard "O" Gauge track of 40" diameter or larger. Add a car a month until you have all of them.

K-521 — BAGGAGE AND CLUB CAR KIT\$4.00

Contains everything needed to build the beautiful authentically scaled Baggage and Club Car shown below. Genuine die-cast car measuring 12" long. Has two 6 wheel trucks and interior electric light.

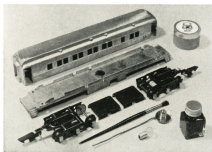

No. 521 — BAGGAGE AND CLUB CAR\$5.00

Finished and Assembled

K-524 — PULLMAN CAR KIT\$4.00

Contains everything needed to assemble and finish the magnificent 12" die-cast Pullman car shown below. Electric light for the interior, double trucks, 12 wheels and simulated glass windows with curtain trim are all included in this exceptional kit.

No. 524 — PULLMAN CAR\$5.00

Finished and Assembled

K-508 — HOPPER CAR KIT\$2.50

When you assemble this 6 1/2" die-cast car you have a job so true to life that even the rivet heads show. Wheels, journal boxes and appointments are authentically scaled. Automatic couplers.

No. 508 — HOPPER CAR\$3.50

Finished and Assembled

K-510 — CATTLE CAR KIT\$2.50

Builds 7 1/2" die-cast model of cars used to transport cattle from the Western Plains to the stock yards of Chicago. Building your own rolling stock the new American Flyer way adds new fun to electric railroading.

No. 510 — CATTLE CAR\$3.50

Finished and Assembled

9 DIFFERENT CARS — YOU CAN BUILD EACH ONE YOURSELF — OR BUY THEM COMPLETELY FINISHED AND READY-TO-RUN

K-512 — TANK CAR KIT\$2.50

Contains complete parts, equipment and instructions for assembling and finishing Texaco Tank Car. Rails, ladders, simulated filler cap, two 4 wheel trucks and automatic couplers, make this 7½" die-cast car vividly realistic.

No. 512 — TANK CAR
Finished and Assembled.....\$3.50

K-504 — GONDOLA CAR KIT\$2.50

Car is die-cast and measures 7½". Kit has all parts and material for complete finishing. Automatic couplers, two 4 wheel trucks, nickel journal boxes and authentic appointments all ready for assembly.

No. 504 — GONDOLA
Finished and Assembled.....\$3.50

K-514 — WRECKER CAR KIT\$3.00

"Big Hook" is what railroad men call a wrecker car. With the fascinating parts in this kit you can build one that looks and works just like the real ones. 7½" long, die-cast.

No. 514 — WRECKER CAR
Finished and Assembled.....\$4.00

K-506 — BOX CAR KIT\$2.50

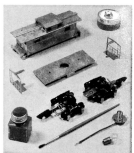

Assembling this die-cast 7½" Box Car will be as much fun as using it afterwards. Kit contains everything you'll need for a finished job including wheels, authentic fittings, automatic couplers, paints and brush.

No. 506 — BOX CAR
Finished and Assembled.....\$3.50

K-516 — CABOOSE KIT\$3.00

Complete parts and equipment for assembling and finishing die-cast caboose, 6" long. Two 4 wheel trucks, automatic couplers, authentic fittings, paint and brush.

No. 516 — CABOOSE
Finished and Assembled.....\$4.00

GILBERT AMERICAN FLYER TRAINS

24 SPECTACULAR TRAINS FOR "O" GAUGE TRACK EACH ONE THE PACEMAKER IN ITS PRICE CLASS

Last year more boys and hobbyists selected American Flyer Trains than ever before. They were quick to discover that the new American Flyer Trains look more realistic—operate in a more realistic way—and are crammed with important extra value features.

Today this is even more true than a year ago. Progress never stops in Gilbert American Flyer engineering. To their achievements of the past, American Flyer engineers and technical experts of the Gilbert Hall of Science have now added more dazzling new features. These new developments further heighten the romance and realism of miniature railroading . . . and multiply by many times the exciting fun that American Flyer trains bring you.

You'll find illustrations and full descriptions of these gleaming, powerful locomotives—rolling stock and equipment on the following pages. Study every picture—read every word.

Here are a few American Flyer high points to keep in mind:

All trains operate by remote control or remote directional control. Many locomotives have worm gear drive.

Many of the trains are 3/16" scale models from end to end. Practically all of the cars—both passenger and freight are accurately built to 3/16" scale.

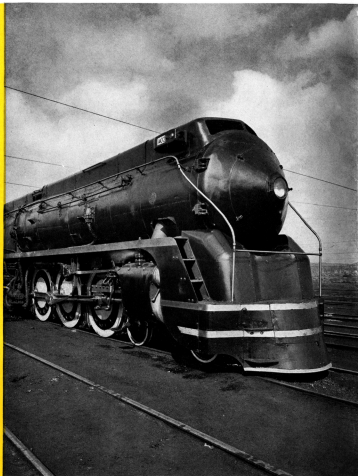

There are 140" or more of running track with every "O" Gauge set.

All American Flyer "O" Gauge track is designed for 40" diameter and is the same high quality construction. Thus any two or more sets can be combined to make a bigger system—and when you buy extra track, you can be sure it will fit.

All trains (except those using close Pullman type coupling) have automatic couplers and either lever controlled uncoupling or electrical uncoupling. Every set has an authentic tender—correctly designed for the locomotive it goes with.

All locomotives have an electric headlight or a Lucite electric headlight.

But hurry and read the full description of each thrilling set. The more you study them—compare them with ordinary train sets—and see what big value you get for your money, the more you will realize why the trend today is towards American Flyer.

Every AMERICAN FLYER "O" GAUGE TRAIN has 140" of running track or more.

PIONEER 2-4-4

No. 4001 — PIONEER PASSENGER TRAIN 38" LONG — 19 PIECES

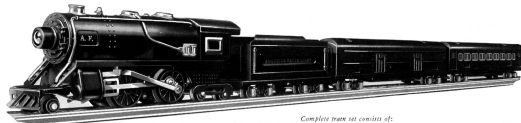

Bright red enamel cars with silver and nickel trim make a vivid picture as they whizz around the track hauled by the husky pressed steel locomotive—finished in realistic locomotive black with nickel trim. Beaming electric headlight and eccentric arm double action piston rods add to the realism—and the tender is piled high with imitation coal.

No. 4003 — STREAMLINER PASSENGER TRAIN 39½" LONG — 19 PIECES

Designed after modern streamliners, this sleek passenger train is a picture of thrilling speed. Its worm drive locomotive assures powerful, quiet and even pull and can be accurately controlled from a slow crawl to high speed. Locomotive is die-cast and finished in glistening gun metal-scent enamel with nickel trim. Cars shine in glittering green enamel with silver and nickel trim.

No. 4004 — STREAMLINER FREIGHT TRAIN 40½" LONG — 20 PIECES

Here's a train you can have a lot of fun with. Stop it, load it, start it, run it at high speed or at a crawl (thanks to the new worm drive locomotive). Reverse it, uncouple the tank car, couple it up again—you'll have the time of your life running this fine train.

FAMOUS PENNSYLVANIA K-5 LOCOMOTIVE PRECISION BUILT TO 3/16" SCALE

- Operates on any "0" Gauge Track of 40" diameter or larger

BUILT FROM
ACTUAL RAILROAD BLUEPRINTS
WITH ALL THESE FEATURES

DIE-CAST
WORM DRIVE
12 WHEELS
4-6-2
REMOTE CONTROL
17 INCHES LONG

LUCITE HEADLIGHT
JEWELLED MARKERS
ECCENTRIC ARM TRIPLE ACTION
PISTON RODS
BUNKER TYPE TENDER
AUTOMATIC COUPLING

WORM DRIVE

An expensive feature that gives you greater gear reduction, more even and more powerful pull, quieter operation, more accurate operating control at a slow crawl or at high speed.

Both Locomotive and Tender Die-Cast

Watch Them Hug the Rails at Top Speed

Pounding down the main line, this exciting 3/16" scale model Pennsylvania K5 engine sings over the iron just the way the big Pennsylvania K5 sings over the rails through the Alleghenies.

With its gleaming Lucite headlight with jeweled markers and its realistic locomotive black finish, this scale model locomotive is one you'll want to own. Six powerful drive wheels, with their eccentric arm triple action piston rods, side rods, and connecting rods add dramatic action.

The tender, also die-cast and finished in locomotive black, is of the bunker type—has double trucks with eight wheels and nickel journal boxes. The bunker itself is piled high with imitation coal.

Together this husky Pennsylvania K5 engine and tender are outstanding examples of the care and precision that American Flyer's engineers have put into these actual 3/16" scale models.

BE THE BOY PRESIDENT OF THE PENNSYLVANIA RAILROAD WITH THIS SUPERB 3/16" SCALE MODEL TRAIN

COLOSSAL 221½" LOCOMOTIVE WITH EIGHT MIGHTY DRIVE WHEELS PRIDE OF THE UNION PACIFIC 3/16" SCALE FOR "O" GAUGE TRACK

REMOTE
CONTROL
DIE-CAST
LOCOMOTIVE
AND TENDER
21½" LONG
4-8-4

Every day monster locomotives like this run the grades of the Union Pacific through the towering Rockies of the West. Thanks to the engineers in the Gilbert Hall of Science this superb engine is now reproduced for the first time in actual 3/16" scale. Every detail has been kept to scale so that you can have in your own home the thrill of seeing Union Pacific's mighty engines in vivid action.

SEE THE POWERFUL EIGHT WHEEL DRIVE IN ACTION

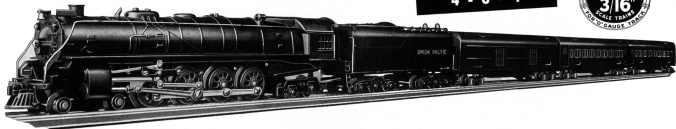

Here's a locomotive you'll be proud of . . . proud of the power of its eight driving wheels and proud of its fine looks, with its Lucite electric headlight.

The realistic eccentric arm triple action, piston rods, side rods, and connecting rods make this 21½" locomotive one of the finest obtainable. A four wheel pony truck and a four wheel booster give this engine a total of sixteen wheels. The tender has twelve more wheels with double die-cast trucks and is an authentic 3/16" scale model of a Union Pacific tender. Both locomotive and tender are finished in realistic locomotive black.

Remote Directional Control

The American Flyer Invention that is
Revolutionizing Miniature Railroading

**Just press control button and your train
instantly glides FORWARD after a stop**

Nothing better demonstrates the super-realism of American Flyer trains than the ease with which you can start them in the same direction as they were going with remote directional control. Or you can start them in the opposite direction if you prefer.

Picture your train pounding down the iron pike at 75 scale miles per hour. A station looms ahead. You ease her to a stop . . . Now you give the highball signal to continue your run. Note this point carefully. With ordinary electric trains your train must first back up before it can go forward. Can you imagine a real train doing that? Of course not. And you don't have to jockey back and forth with an American Flyer either.

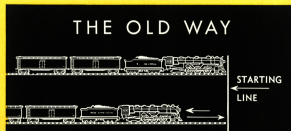

Thanks to its new Remote Directional Control, it glides forward and backward or stands still—with headlight on—the moment you touch the control.

Directional Remote Control has a big advantage when used in connection with Block Signals, a-Koostikin and other train controlling equipment. When train is stopped, it will start in the same direction when equipment automatically causes it to proceed. At the same time you can control your train in either direction. In other words, the equipment (signals, a-Koostikin, etc.) controls the train without affecting the direction of the train.

On trains equipped with Standard Remote Control it is necessary to manually disengage the control to enable the train to operate automatically with Block Signals, a-Koostikin and other train controlling equipment.

Remote Directional Control comes only with "O" Gauge Trains Nos. 4019, 4020, 4021, 4022, 4023, 4024 and all HO Gauge Trains.

← STARTING LINE

Train running in forward direction is stopped. Before it can go forward again, it must first back up. Remote directional control banishes this waste motion and allows train to proceed in same direction without reversing.

Remote directional control will operate on A. C. current only.

**SPECTACULAR
TWO TRAIN OPERATION
ON SINGLE TRACK
NOW POSSIBLE**

Two trains are operating on the same track in the same direction. Train A operates by Standard Remote Control, Train B operates on Directional Remote Control. Train B starts to overtake Train A; a rear end collision seems imminent. But no—by Directional Remote Control you stop Train B, as Train A continues on. When a safe distance ahead, you let Train B resume its run. Remote Directional Control enables you to stop Train B without stopping Train A. Also, you can instantly make Train B go forward or backwards regardless of the direction in which Train A is running.

UNION PACIFIC — GIANT OF THE RAILS

With eight huge drive wheels whirling . . . eccentric triple arm piston rods flashing back and forth, these superb engines pound down the main line at a terrific pace. Die-cast to actual 3/16" scale from its Lucite headlight with jewel markers to the last detail of the rear car—and with remote directional control to give you instant mastery over stopping and starting in either direction—these sets represent the latest triumph in realistic appearance and realistic operation.

WORM DRIVE — 4-8-4 TYPE
REMOTE DIRECTIONAL CONTROL
DIE-CAST LOCOMOTIVE AND TENDER
DIE-CAST CARS — ACTUAL 3/16" SCALE
AUTOMATIC COUPLING
ELECTRICAL UNCOUPLING
"O" GAUGE

**ALL THESE FINE FEATURES INCLUDED
 WITH THESE SUPERB DIE-CAST TRAINS**

With remote directional control you can instantly start your train forward again after a stop without reversing it.

Both these trains are built to 3/16" scale from actual railroad blueprints and are exact reproductions of famous Union Pacific trains.

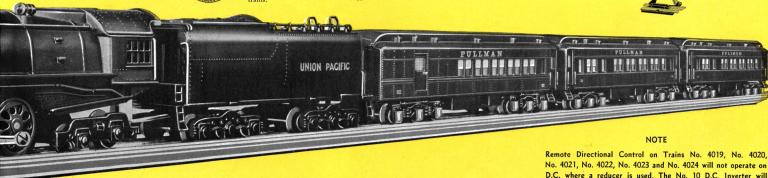

Worm drive means more power, quieter operation and greater control at low and high speeds.

Automatically cars will couple when they come in contact with each other, thanks to the ingenious automatic couplers.

Electrical uncoupler enables you to uncouple cars while the train is in motion and by remote control.

3 No. 681 10" straight track sections60
1 No. 675 10" straight track section with built-in remote control electrical uncoupling device (tracks make 160" oval)	2.50
1 No. 450 Track terminal20
1 No. 540 Directional control box	1.50
Total cost of above units, if purchased separately	\$45.70
No. 4023 TRAIN SET COMPLETE	\$32.50

NOTE

Remote Directional Control on Trains No. 4019, No. 4020, No. 4021, No. 4022, No. 4023 and No. 4024 will not operate on D.C. where a reducer is used. The No. 10 D.C. Inverter will have to be used to operate these trains on Direct Current.

NEW "SAFETY first" Transformers

OPERATE ONLY ON ALTERNATING CURRENT

"Safety First" is the motto of the railroads. And it is the motto of the American Flyer's engineers in perfecting these new "Safety First" transformers.

Here are the outstanding Safety Features of American Flyer transformers:

1. Output limited to 15 volts, materially reducing danger of burning out lights, motors, etc.
2. Built-in circuit breaker protects voltage as well as variable voltage.
3. Red pilot flashes on whenever short circuits occur—stays on until short is corrected. This feature in all models except Nos. 5, 5A, 6, 6A where No. 11 transformer cut-out is recommended.

4. Green pilot shines as long as current is passing through transformer in models 8B and 9B.
5. Simplified three terminal post arrangement eliminates complicated equipment circuits.
6. Engineer's throttle control on all models. No complicated control buttons that confuse.
7. All models show "miles per hour" and have needle point throttle that enables you to regulate train speed with accuracy and safety.
8. All American Flyer transformers drawing up to 100 watts are approved by Underwriters' Laboratories.

No. 5 "SAFETY FIRST" TRANSFORMER
50 Watts — 60 Cycles.....\$2.50

No. 6 "SAFETY FIRST" TRANSFORMER
75 Watts — 60 Cycles.....\$3.50

Instrument panel shows "miles per hour" train is set for. No. 11 transformer cut-out recommended for protective purposes with both these models. Approved by Underwriters' Laboratories.

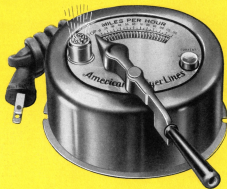

No. 5A "SAFETY FIRST" TRANSFORMER
50 Watts — 25 Cycles.....\$3.00

No. 6A "SAFETY FIRST" TRANSFORMER
75 Watts — 25 Cycles.....\$4.00

15 Volt - Maximum Output
Guards against burning out operating equipment

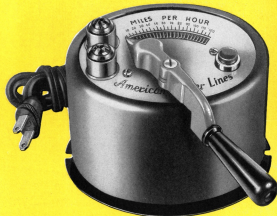

No. 7-B "SAFETY FIRST" TRANSFORMER
75 Watts — 60 Cycles.....\$5.00

Instrument panel shows "miles per hour" train is set for. Red pilot light shines when short circuit occurs and stays on until short is corrected. Approved by Underwriters' Laboratories.

No. 8-B "SAFETY FIRST" TRANSFORMER
100 Watts — 60 Cycles.....\$6.50

Has green "tell tale" pilot light which shines as long as current is passing through the transformer and a red pilot light which flashes red when a short circuit occurs. Instrument panel shows "miles per hour" train is set for. Approved by Underwriters' Laboratories.

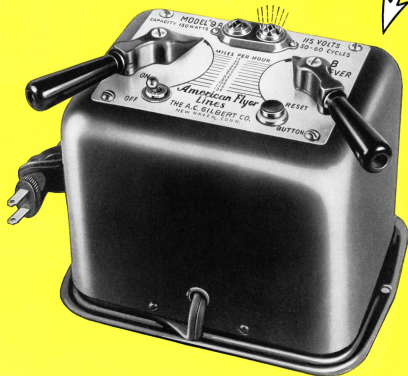

Super Power Units — that make your trains storm over the iron at breathless speed . . .

No. 9-B TWIN CONTROL "SAFETY FIRST" TRANSFORMER

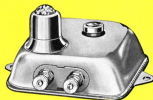

150 Watts — 60 Cycles.....\$10.00

Two transformers for the price of one. Will operate from two to four trains on two separate layouts. Makes possible operation of trains on separate track layouts at different rates of speed. Off-and-on switch located on transformer—handiest possible place.

SUPERIOR CONSTRUCTION

American Flyer transformers are designed to increase or decrease the speed of your trains gradually, so that it is not necessary to use a rheostat or other expensive equipment to run your trains. The taps or contacts on some types of transformers are exposed, making them subject to short circuit. On American Flyer transformers these contacts are completely concealed undercover, thus eliminating the possibilities of a faulty electrical contact. While especially made to operate American Flyer trains, these transformers are equally good in the operation of other electrical toys.

No. 11 TRANSFORMER CIRCUIT BREAKER \$1.50

Protects transformer when short circuit occurs. Red "jewel" light flashes when there's trouble. Recommended for use with transformers Nos. 5, 5A, 6, 6A.

No. 10 D. C. INVERTER\$7.95

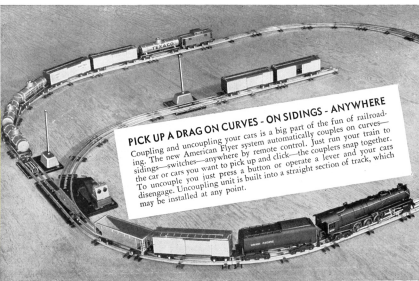

If direct current is available instead of alternating current, all American Flyer trains should be run with an inverter in series. This inverter changes the direct current to alternating current and therefore a transformer can be used and all other A. C. accessories with trains, such as directional control, crossing gate, etc. The inverter has a cord and plug, also a female socket. The plug should be inserted into the D. C. supply outlet and the transformer into the female socket of the inverter. Extra inverter fuses (No. 541) are \$.15 a piece.

**"O" GAUGE
EQUIPMENT**

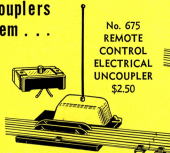

New Automatic Couplers and Electric Uncouplers Modernize your present system with them . . .

Page 28

PICK UP A DRAG ON CURVES - ON SIDINGS - ANYWHERE

Coupling and uncoupling your cars is a big part of the fun of railroad-ing. The new American Flyer system automatically couples on curves—sidings—switches—anywhere by remote control. Just run your train to the car or cars you want to pick up and click—the couplers snap together. To uncouple you just press a button or operate a lever and your cars disengage. Uncoupling unit is built into a straight section of track, which may be installed at any point.

No. 675
REMOTE
CONTROL
ELECTRICAL
UNCOUPLER
\$2.50

This new type uncoupler operates by remote control. Uncoupling mechanism is built into 10" straight track section and uncouples cars as fast as they move by. Operates only with new-style American Flyer automatic couplers. Complete with remote control button box and track terminal.

No. 674
UNCOUPLER
Manual Control
\$1.25

Manually controlled trip built into track unit that disengages car couplers when raised, and allows you to drop whatever car you wish from your train as it speeds by. Complete with 10" track section and operating lever.

No. 677 AUTOMATIC TRACK TRIP...\$35

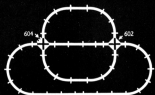

Contact strip that fits into track section and completes circuit as train passes over. Operates gate signals or other automatic equipment.

No. 676 AUTOMATIC COUPLERS.....\$75 per pair

Assembled to truck housing—no wheels or axles. Used for converting cars with old style couplers to new positive action type. Pick up car automatically on curves, straight ways, anywhere on the track. Sold in pairs. Old wheels and axle easily spring into truck housing.

"O" GAUGE TRACK LAYOUTS

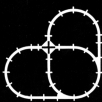

No. 1—Space 67 1/2 x 105" Track 24 Curve 11 Straight 2 1/2 Straight 1 Crossover 1 Train Control Crossover
THIS LAYOUT ALLOWS THE OPERATION OF TWO TRAINS AT THE SAME TIME. A TRAIN CONTROL CROSSOVER IS USED TO PREVENT COLLISIONS.

No. 602 CROSSOVER.....\$1.25
Without Control Button

No. 604 REMOTE CONTROL 90° CROSSOVER.....\$3.00

With Control Button

The remote control crossover, No. 604, which includes double button control box, enables you to operate two trains on crossing tracks in such a way as to avoid collisions. Whenever trains approach crossover at the same time, you simply push a button on the control box—stopping one train until the other is safely passed.

The practical use for No. 604 crossover is where two distinct track loops intersect each other at two separate points as shown in diagram No. 1 on page 28.

New Double Action Remote Control Switches — Make one train roar around the track while keeping another train idle on siding

A SENSATIONAL EXCLUSIVE AMERICAN FLYER DEVELOPMENT

Perhaps you've seen pictures of a modern railroad control room. Here—keeping an eagle eye on the maze of tracks around him, a cool headed towerman throws switches ("or bends the iron" in his language) as first one train and then another demands the right of way.

Today with American Flyer Double Action Remote Control Switches you, too, can perform similar feats of wizardry. By throwing switches at the right moment . . . stopping one train . . . starting another, you can make spectators gasp with wonder at your skill.

For example: A DeLuxe Express is hitting the curves on the main line. A freight on a siding is getting under way. The switch ahead is open. A collision seems certain!

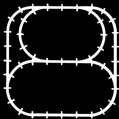

But you're on your toes. You know your job. With lever control you close the open switch automatically stopping the freight and the express whizzes by.

Then, as soon as the main line is clear, you open your switch—start your freight and see it roll majestically on its way.

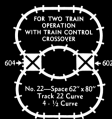

Inventions such as this make American Flyer trains the choice of boys who want all the thrills that railroading provides.

No. 20 — Space 65" x 130" Track 22 Curve 4 - 1/2 Curve

WHOO-WHOO-OO

**"O" GAUGE
EQUIPMENT**

Now — Two Ways to add Thrilling — Realistic Remote Control Whistling to Your Railroad

There's nothing make believe about the tone of these new American Flyer Whistles. Their deep-throated blasts carry the same ominous warning that you hear when a real Limited storms down the rails.

American Flyer Whistles are available either in the new whistling express car or in the big colorful, illuminated billboard. No matter which American Flyer method of whistling you select (and many boys will want both), each is a double feature, realistic addition to your railroad system.

No. 490 — Whistling Express Car (Remote Control) \$4.95

(Including Single Button Control Box)

Here's a big double value—two features for the price of one—a realistic whistle and a 3/16" scale model express car that can be used on both passenger and freight trains. This car is the newest development in direct from the train whistling and the only method that permits the use of a tender correctly scaled to its locomotive. You can sound the whistle anytime and anywhere and blow all code signals with the remote control push button. This whistling Express car is a fine addition to any standard remote control train. It cannot, however, be used in connection with directional remote control, or with trains operating on 25 cycles. When you have either of these conditions, use the billboard described below.

No. 577 — Whistling Billboard (Remote or Automatic Control) \$2.50

(Including Automatic Track Trip and Single Button Control Box)

Tru-tone railroad whistle mounted in a picturesque illuminated billboard. This method of whistling permits all American Flyer tenders to be correctly scaled to engines. You can operate this realistic whistle anytime by remote control or let it blow automatically through a track trip, which can be placed at any point in your track layouts. Whistle can be operated at same time with block signal system. Operates on 25 or 60 cycles, A, C, or D, C.

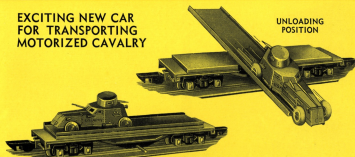

Add a Car a Month and make your Railroad System Complete — Pressed Steel Cars built to actual 3/16" Scale.

FOR DIE-CAST CARS
SEE PAGES 6 AND 7

"O" GAUGE
EQUIPMENT

No matter what train set you get for Christmas or what cars you already have, you'll need one of each of these cars to get your railroad on a "big time" basis. Also make sure your rolling stock is up-to-the-minute by getting real American Flyer 3/16" scale model cars. Remember, all American Flyer cars have genuine electrically baked enamel finish. All have automatic coupling. Make a list of the cars you need right now. Then add a new car every month.

EXCITING NEW CAR FOR TRANSPORTING MOTORIZED CAVALRY

UNLOADING
POSITION

No. 472 — AUTOMATIC ARMY UNLOADING CAR.....\$3.95

(Includes Automatic Track Trip and Single Button Control Box)

Here's real action. A flash order for immediate protection of your vital railroad terminal. Full speed to the station. Then press the control button . . . the platform on the car swivels, tilts, and down the incline shoots the armored truck ready for action. This model, exclusive with American Flyer, is brilliantly colored in enamel finish.

"O" Gauge Scale

"O" Gauge Scale

**No. 582
AUTOMATIC
BLINKER SIGNAL**
Accurate "O" Gauge
Scale

"Safety First" is the watchword of American Flyer trains. And you'll want to protect the high-way crossings on your model railroad as on the big railroad. Here's a blinker signal that flashes red as the train approaches and warns cars and pedestrians not to cross. Signal is mounted on sturdy base with metal upright support for double bull's eye blinkers. Flashing Lucite signals. Operates automatically from your track trip as train passes. Enamel finish. Size $4\frac{1}{4}" \times 2\frac{3}{4}" \times 2\frac{3}{16}"$.

Price including Automatic Track Trip. \$2.95

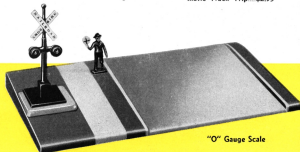

**No. 591 CROSSING GATE
and WATCHMAN'S SHACK**
Accurate "O" Gauge Scale

Your speeding train automatically controls the raising and lowering of the double arm gates. Red light shines when the gate is down—all in all a most realistic scene with a watchman's house and an imitation road. Die-cast throughout with an enamel finish. Size $10" \times 5\frac{1}{4}"$.

Price including Automatic Track
Trip\$3.95

No. 593 SIGNAL TOWER\$2.95
Accurate "O" Gauge Scale

True representation of the towers in real railroad yards from which tracks and switches are controlled as trains are made up and zoom in and out of terminals. The stairs lead up to a lighted operator's room where windows on three sides command the track. Finished in baked enamel—real railroad colors. Size $7\frac{3}{4}" \times 5\frac{1}{2}"$.

"O" Gauge Scale

No. 584 BELL DANGER SIGNAL\$4.95
(With Automatic Track Trip)

For top in realism add this dramatic piece of equipment with its Lucite blinking signal and its sharp warning bell that rings as trains pass by. And for super safety, a watchman guards the crossing with hand signal. Brilliant enamel finish. Size $10" \times 5\frac{1}{4}"$.

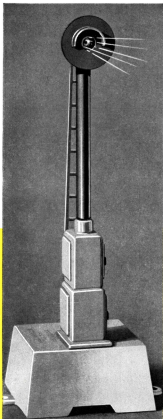

No. 587 AUTOMATIC
BLOCK SIGNAL\$3.95

Page 35

(With Automatic Track Trip and Remote
Control Box)

Beaming Lucite light flashes red to stop train—green to go. Permits one train to follow another on single track without danger of collision, holding up a train until block ahead is clear, then allowing it to proceed. Electrically operated by remote control for one train. Two train operation works automatically from trips in track. Enamel finish. Size $3\frac{1}{2}$ " high, base $1\frac{3}{4}$ " x $1\frac{3}{4}$ ".

"O" Gauge Scale

New American Flyer Lucite Block Signal System — with Lights that flash Red and Green — Starting and Stopping Your Trains — Operates like a Real Block Signal System

"O" GAUGE
EQUIPMENT

Make "Safety First" the watchword of your American Flyer system by installing this new Lucite block signal system and operating your trains with true-to-railroading realism—and with the dazzling effects that Lucite lighting creates.

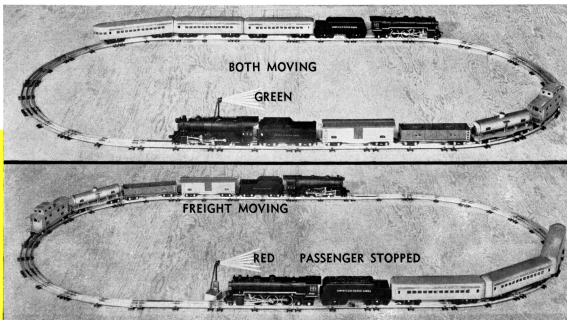

Look at the pictures below and see what happens. Two trains are racing around the single track. You see the rear train rapidly gaining on the first. Breathlessly you watch. Will there be a collision?

No! Your American Flyer Lucite block signal system automatically stops the second train and the signal light stays red until the first train has cleared the block.

But look again! Now the first train is out of the block. The red signal turns green. The block is clear. The second train gathers speed and once more is storming down the main line.

When running one train, you can make the lights flash red and green by remote control . . . letting the block signals stop and start your train.

GET THE THRILL OF HIGHBALLING TWO TRAINS ON THE SAME TRACK WITHOUT DANGER OF COLLISION. THE ONLY TRU-SCALE BLOCK SIGNAL SYSTEM WITH LUCITE LIGHTS.

EQUIPMENT**

Spectacular Action — and Plenty of it with the — NEW LOADING and UNLOADING ELECTROMATIC CRANE

**Grab Up a Load of Steel With the Powerful Electro-Magnet —
Swing It Over The Car — and Unload It — All by Remote Control**

No. 583

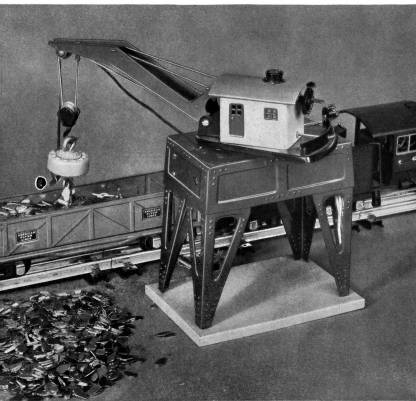

**ELECTROMATIC
CRANE
\$6.95**

(Including Remote Control Box
and Track Terminal)

In this new Electromatic Crane American Flyer engineers bring you a thrilling mechanism of miniature railroading—a towering revolving crane—complete with operator's cab, powerful boom with electro-magnet that can be raised or lowered.

Picture it loading steel into your empty freight car. You lower the crane over the pile of metal . . . chunks of steel leap up to grab the oncoming magnet . . . then you hoist your magnet high into the air . . . swing it over the car . . . lower it . . . cut off the magnetic power . . . and the load of steel clatters into the car.

You perform all of these operations by remote control. No freight train outfit is complete without this marvelous equipment. Can be used with any system.

No. 98 FREIGHT STATION WITH CRANE.....\$4.95

(Including Track Terminal)

You'll have fun galore when you add this station and crane to your railroad system. Station has electric light, sliding doors, and inclined loading platform. Hand operated crane. Cab and boom mounted on swivel base permitting a complete revolution. Boom raises and lowers. Size 8" x 19" x 6 $\frac{3}{8}$ ".

Produce the Thrilling Noises of a Real Railroad Station with the NEW a-KOOSTIKIN TALKING STATION . . .

"O" GAUGE
EQUIPMENT

Automatically Stops Your Train . . . Calls Out the Stations . . .
Hisses . . . Chugs . . . Whistles . . . and Starts Your Train Again

You can scarcely believe your eyes and ears at all the astounding and mystifying feats of the a-Koostikin, miniature railroad's first and only talking station.

Imagine your crack express looming up in the distance. Nearer and nearer it comes. Then as it reaches the station it snails to a stop . . . Suddenly you hear all the noise and clamor that are such an exciting part of a great railway terminal . . . trainmen calling stations and shouting "All aboard" . . . the hiss of steam . . . the chug of pistons . . .

the blasts of whistles.

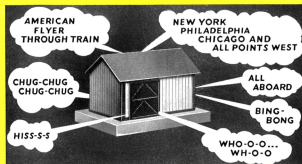

But that is not all. As a final marvel, your train slowly pulls out of the station . . . gathers speed and is on its way to the next stop.

Remember, you don't have to touch a single thing while the a-Koostikin is in operation. The a-Koostikin stops the train—produces the roar of the station—and starts your train again—all automatically.

No. 595 a-KOOSTIKIN TALKING TOOL SHED

If you already have a station, the best way to own an a-Koostikin is to buy this realistic tool shed with sliding door. Produces the sound effects of real railroading. Stops and starts your train—all automatically.

Complete with Automatic Track Trip.....\$6.95

No. 598 a-KOOSTIKIN RECORD.....\$3.95

Extra recordings are available for use with units No. 595 and No. 597.

Note: Nos. 595 and 597 operate on A. C. only. To operate on D. C. an inverter must be used. They will not operate on 25-40 cycles. See page 27.

No. 597 a-KOOSTIKIN TALKING PASSENGER AND FREIGHT STATION

The most realistic and thrilling station ever invented—an exclusive development of American Flyer engineers. This uncanny station automatically stops your train—produces the exciting true-to-life sounds of an actual railroad terminal—then starts your train. a-Koostikin is the only station through whose windows you'll hear train announcing, hiss of steam, chug of pistons and other railroad effects. It's a big roomy station, too, with windows, electric light, swinging doors, freight platform with two sliding doors. Enamel finish. Entire outfit on platform—size 6" x 12" x 18".

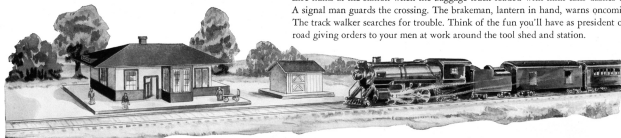

Complete with Automatic Track Trip.....\$9.95

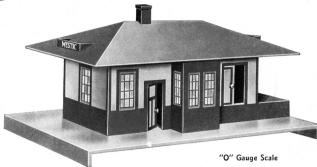

**"O" GAUGE
EQUIPMENT**

A Real Railroad Needs Stations and Men, too — Here's How to Create True-to-Life Effects

Life hums at the station when the baggage truck loaded with milk cans dashes to unload. A signal man guards the crossing. The brakeman, lantern in hand, warns oncoming trains. The track walker searches for trouble. Think of the fun you'll have as president of the railroad giving orders to your men at work around the tool shed and station.

"O" Gauge Scale

"O" Gauge Scale

"O" Gauge Scale

No. 585 TOOL SHED \$1.25

No railroad is complete without a tool shed to store material. Why not use this shed to store extra light bulbs, extra wire and material just as a regular railroad would. Sliding door. Enamel finish. Size $4\frac{1}{2}'' \times 6\frac{3}{4}'' \times 5\frac{1}{4}''$.

No. 589 PASSENGER AND FREIGHT STATION.....\$3.95 (Including Track Terminal)

Big passenger station with realistic windows, swinging door and interior illumination. Freight section has raised platform and two sliding doors. Plenty of room on platform for passengers and baggage. Enamel finish. Size $6'' \times 12'' \times 8''$.

No. 578 STATION FIGURE SET\$2.00

Employ this fine group of six railroad workers with their platform truck, to help you run your railroad and add realistic hustle and bustle around the station. All figures, 2 milk cans and barrel, hand painted.

Roar through dark tunnels — clatter over bridges and operate your trains with resplendent realism...

**"O" GAUGE
EQUIPMENT**

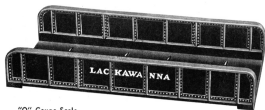

"O" GAUGE TUNNELS

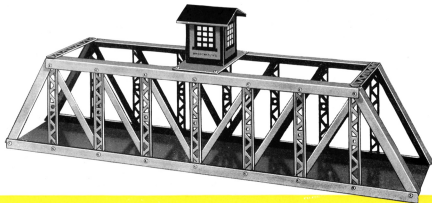

No. 247 — 11" STRAIGHT.....\$1.00

No. 248 — 14" STRAIGHT.....\$2.00

Add extra thrills to model railroading when fast trains roar through at high speed. These tunnels are realistically designed and finished in brilliant colors.

"O" Gauge Scale

No. 581 GIRDER BRIDGE.....\$2.00

This modern girder type bridge is so carefully designed and scaled that it's a fitting companion to the perfectly executed locomotives and cars of the American Flyer "O" Gauge Line. As your train rushes over it, the side pieces echo and re-echo the clackety-clack of wheels pounding on rails. The finish is authentic railroad black. Size 10" x 1 3/4" x 4 7/8".

No. 2 TRESTLE BRIDGE.....\$2.50

(Including Track Terminal)

Built of heavy steel and designed like the husky big ones, this trestle bridge is all ready for heavy duty work. Atop the bridge is an illuminated tender house to add another note of realism. The whole bridge is finished in a bright enamel finish. Size 25" x 5 1/2" x 8 1/2".

**"O" GAUGE
EQUIPMENT**

Electrically Lighted Water Towers and Whistling Billboard add Striking Sound and Scenic Effects

If you've ever travelled over the rolling Western plains, you've seen miles ahead the tall water towers so necessary to running steam locomotives. And you'll need one of these fine towers, too, to make your set more realistic and more authentic. And for sound effects, be sure to get the whistling illuminated billboard.

COMBINATION WHISTLE and BILLBOARD

When you run your train at night this illuminated billboard makes a spectacular sight and doubly so when its full throated whistle adds an authentic note of warning.

No. 215 Water Tank.....\$1.25

(Including Track Terminal)

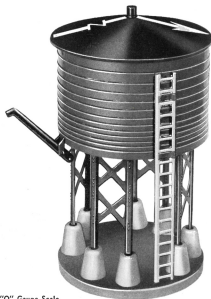

A big American Flyer double value. Has aviation beacon electric light on top of the tank. Water spout can be raised and lowered. Height, including structural base is 9½".

No. 577 Whistling Billboard (Remote or Automatic Control)\$2.50

(Including Automatic Track Trip and Single Button Control Box)

Whoo-oo-oo! What a realistic and startling sound every time your train passes over the automatic track trip. Or you blow the danger whistle anytime you want by pressing the control button. The whistle is placed in the illuminated billboard rather than in the tender—so that all tenders can be true to scale. Whistle can be operated at same time as block signal system. Operates on 25 or 60 cycles, A. C. or D. C.

"O" Gauge Scale

No. 596 Water Tank.....\$3.95

(Including Track Terminal and Control Box)

An electrically operated push button lowers and raises the spout of this superb water tower. Atop is a direction arrow and an aviation warning light. From a realistic structural base a ladder leads to the top of the tank. Brilliantly colored throughout. Size 11" x 6" x 6½".

Spectacular night lighting effects for your Railroad System

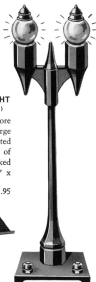

"O" GAUGE
EQUIPMENT

If you've been to the New York World's Fair and seen the Miniature Railroads with their startling night effects of lighted trains, illuminated stations, and street lights, you'll want to reproduce the same effects in your home. And you can with the fine lighting equipment of the American Flyer System.

LAMPS—Always have extras on hand, \$2.25 pkg.

Lamps are used as follows: No. 440 in all Locomotives and cars, all stations and accessories except No. 579 and 580. No. 451 for No. 579 and No. 580 lamp posts. No. 441 where red globes are required. No. 443 where green globes are required.

No.	Volts	Glass	Color	Diam.	Lamps in pkg.
440	14	Round	Clear	7/16"	3
441	14	Round	Red	3/8"	3
443	14	Round	Green	3/8"	3
451	14	Round	Frosted	3/8"	1

"O" Gauge Scale

No. 580

DOUBLE ARC LIGHT (Including Track Terminal)

Makes night operation more spectacular. The two large domes enclosing frosted lights mounted at top of single post support. Baked enamel finish. Size 6 1/2" x 1 1/2".

Price \$1.95

"O" Gauge Scale

"O" Gauge Scale

No. 586 WAYSIDE STATION (Including Track Terminal)

Smart new suburban station with double seating bench. Two lights under the long roof give a unique indirect lighting effect. Brilliant baked enamel. Size 12" x 5" x 3 3/4".

Price \$2.00

Howdy Pal!

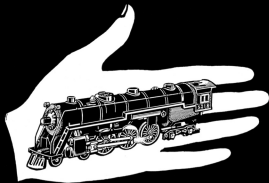

Let's Talk like the
Men who Highball
the HOTSHOTS!

★ RAILROAD LINGO ★

Battleship	Large Locomotive	Highball Artist	Engineer noted for fast running
Bend the Iron or Bend the Rail	Change the position of a switch	High Iron, Main Iron or Main Stem	Main line track
Big Hook	Wrecking Crane	Highliner	Main line passenger express train
Black Snake	Train of coal cars	Hit the dirt	To jump or fall off moving train
Brass Pounder, Lightning Slinger	or Op. Telegraph Operator	Hit the dirt	To jump or fall off moving train
Captain, Brains or Skipper	Conductor	Hog, Pig, Smoker	Locomotive
Cinder Cruncher, Dolly Flapper	or Snake Switchman	Hole	Siding into which train pulls to let another pass
Club Winder, Ground Hog	or Shack Brakeman	Hot Shot	Fast passenger or freight train
Clown Wagon, Crummy, Dog-House, Hack, Monkey House, Shanty	Caboose	King	Freight conductor or yardmaster
Cornfield Meet	Head-on collision between two trains on same main track	Liner	Passenger Train
Cut	Several cars coupled together or attached to engine	Mtys	Empty cars
Detainer	Train Dispatcher	Paddle	Semaphore signal
Diamond	Track crossover	Peddler	Local Freight
Dinger	Yardmaster	Pike	Railroad system
Drag	A slow freight train	Plug	Locomotive throttle
Eagle Eye, Hogger, Hoghead, Pig	Mauler or Whistle Pig Engineer	Pound Her	Work locomotive to capacity
Flimsy	Written train order	Rattler	Freight Train
Garden	Freight yard	Red Ball	Fast Freight
Gate	Switch	Shuffle the Deck	To switch cars on house tracks at every station
Glory	String of empty cars	String	Several cars coupled together
Gon	Gondola car	Tank	Locomotive tender
Highball	Signal for clear track, meaning go ahead at high speed	Varnish	Passenger cars or train
		Washout	Quick stop signal
		Whale Belly	Steel coal car
		Wheel	To drive locomotive at high speed

GILBERT American Flyer TRU-MODEL "HO" Miniature Trains

BUILT TO SCALE FROM RAILROAD BLUEPRINTS

..... CORRECT IN EVERY DETAIL

ALL LOCOMOTIVES, TENDERS AND CARS DIE-CAST — OPERATE ON REALISTIC "2-RAIL" TRACK, MOUNTED ON ROADBED BASE. REMOTE DIRECTIONAL CONTROL — AUTOMATIC COUPLINGS.

← APPROXIMATELY ½ SIZE OF "O" GAUGE —

NOTE: Remote Directional Control on Trains HO-103, HO-104, HO-105 will not operate on D.C. where a reducer is used. The No. 10 D.C. Inverter will have to be used to operate these trains on Direct Current.

Not only do these new "HO" trains represent the utmost in realism, but their small size enables you to have elaborate and exciting track layouts in extremely small space. An especially notable achievement is the 2 rail track, eliminating a center rail. Brass wheels on opposite tender trucks act as current collectors—while all other wheels are of Bakelite. Drive wheels have brass rims. 20 to 1 gear reduction assures amazing pulling power. Actual stop-watch tests show these matchless trains can attain a speed of 190 scale miles per hour. While these "HO" trains are built to hobbyist's precision standards, their modest price puts them within the reach of all to whom miniature railroading is an ever-thrilling adventure.

50 or 75 Watt Transformer recommended.

HO-103 — 3 CAR "HOT SHOT" FREIGHT TRAIN — 31" LONG

REMOTE DIRECTIONAL CONTROL — AUTOMATIC COUPLING

Track Terminal and Control Box included

A marvel of Tru-Model design and precision construction—this 14" die-cast remote directional control N.Y.C. Hudson type locomotive with its tender and cars surges over the iron with a rush of power. Lighting the way is a beaming Lucite headlight while the eccentric arms, valve levers and piston rods shuttle back and forth with gleaming realism. Each of the die cast cars has automatic couplers.

Operates on A.C. only. See note.

Complete train consists of:
 1 HO-112 Locomotive and tender—14" long
 1 HO-117 "Lehigh N.E." Gondola with fluorescent finish
 1 HO-114 "Merchants Despatch" Ref. Car, tuscan red with white sides
 1 HO-120 Gaboose with cupola, end rails and ladders
 12 8½" sections HO-260 Curve track on realistic Bakelite roadbed base (makes 100" circle—32" diam.)

HO-103 TRAIN SET\$19.95

PRIDE OF HOBBYISTS — THEY POUND THE PIKE AT 190 SCALE MILES PER HOUR

75 or 100 Watt Transformer recommended.

**DIE-CAST
LOCOMOTIVES
TENDERS AND CARS**

**REALISTIC
TWO RAIL TRACK
NO CENTER RAIL**

**REMOTE
DIRECTIONAL
CONTROL**

**AUTOMATIC
COUPLING**

½ SIZE OF "O" GAUGE

HO-104 — 3 CAR "HOT SHOT" PASSENGER TRAIN — 42" LONG

REMOTE DIRECTIONAL CONTROL — AUTOMATIC COUPLING

Train hobbyists of all ages experience new thrills when they see and wheel this Tru-Model passenger train. With the same fine, die-cast, remote directional control locomotive that's made American Flyer "HO" trains famous, it represents the last word in miniature train design. 9" cars have automatic couplers, Bakelite wheels and are finished in beautiful green electrically baked enamel.

Operates on A.C. only. See note page 42.

Complete train consists of:

- 1 HO-112 N.Y.C. Hudson type (4-6-4) Locomotive and Tender—14" long
- 1 HO-121 Baggage and Mail Car
- 2 HO-122 Passenger Coaches
- 12 Tracks—8 3/8" sections HO-260 Curve. Realistic Bakelite roadbed (makes 100" oval)

**Track Terminal and
Control Box included**

HO-104 TRAIN SET \$22.95

75 or 100 Watt Transformer recommended.

HO-105 — 7 CAR Transcontinental RED BALL — 56½" LONG

REMOTE DIRECTIONAL CONTROL — AUTOMATIC COUPLING

The glory of "HO" railroading. Combining authentic appearance with breath-taking performance this 7 car "Red Ball" deserves its reputation as the finest value miniature train ever offered to boys or grown-up hobbyists.

Operates on A.C. only. See note page 42.

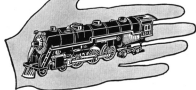

**Track Terminal and
Control Box included**

Complete train consists of:

- 1 HO-112 N.Y.C. Hudson type (4-6-4) Locomotive and tender—14" long
- 1 HO-113 "Pacific Fruit Express" Ref. Car. Tuscan red with yellow sides. Ladder and catwalk.
- 1 HO-118 "P.R.R." Gondola. Tuscan red with white lettering
- 1 HO-114 "Merchants Despatch" Ref. Car. Tuscan red, white sides. Ladder and catwalk
- 1 HO-116 "Sinclair" Tank Car. Black tank, white lettering
- 1 HO-115 "Texaco" Tank Car. Silver tank, black lettering
- 1 HO-119 "Ill. Central" Flat Car. Loaded with three trucks with wheels
- 1 HO-120 Caboose with cupola, end rails and ladders
- 14 Tracks—12 8 3/8" sections HO-260 curve and two 8" sections HO-261 straight (makes 116" oval)

HO-105 TRAIN SET \$24.95

"HO" GAUGE THE HOBBYISTS' LINE

Add a second engine . . . more cars to your HO line . . . and Double your Fun

No matter whether you start your HO line with a passenger train or a freight train, sooner or later you will want both.

With the new American Flyer equipment, two trains make possible many exciting and spectacular feats of operation. For example, running two trains on the same track under automatic block signal control. Highballing one train while a second is idle on a siding.

In addition, HO Gauge track—because of its realistic 2-rail construction and the small space it requires—is ideally suited for double track layouts. With passenger and freight trains running in opposite directions and Lucite headlights illuminating the track ahead, they make a blood-tingling spectacle as they roar by each other.

Look over cars and kits described on these pages. Notice you can buy them two ways: All ready to run or in easy-to-assemble kits.

HO-120 Caboose Kit\$1.50
This fascinating kit builds an authentic perfectly scaled caboose. Everything you'll need from start to finish is included along with easy-to-follow instruction sheet.

HO-120 Caboose—4½" long\$2.00
Perfectly scaled and authentically finished to the last detail with cupola, brass end rails and ladders. Like all "HO" cars it's die-cast and has 8 bakelite wheels.

**HO-117K "L.N.E." Gondola Car Kit and
HO-118K "Penn." Gondola Car Kit**.....\$1.50 ea.
You'll want to build both of these gondola cars. Each kit contains everything needed including automatic couplers, paint and brushes.

HO-117 Gondola Car—5¾" long\$2.00
"Lehigh New England" gondola. Has authentic appointments and metal-look finish with white lettering.

HO-118 "P.R.R." Gondola—5¾" long\$2.00
This perfect miniature of a Pennsylvania car is Tuscan red with white markings.

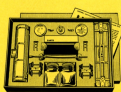

**HO-113K "Pacific Fruit Express" and
HO-114K "Merchants Despatch" Ref. Car
Kits**.....\$1.50 ea.

Die-cast sections, trucks, bakelite wheels, automatic couplers, paint—everything needed to build a modern refrigerator car. Two models to choose from.

**HO-113 "Pacific Fruit Express" Ref. Car
5¾" long**\$2.00
Authentic in every detail—has double die-cast trucks, 8 wheels and finished in Tuscan red with yellow sides.

**HO-114 "Merchants Despatch" Ref. Car
5¾" long**\$2.00
Similar to above with white sides, simulated ladders and catwalk.

**HO-115K "Texaco" Tank Car and
HO-116K "Sinclair" Tank Car Kits**.....\$1.50 ea.
These two kits make Tank cars which are exact replicas of those used by two of the major oil companies. The "Texaco" car finish is silver and the "Sinclair" is black.

HO-115 "Texaco" Tank Car—5¾" long.....\$2.00
Here's a perfect miniature of the famous cars used by the big oil companies. Has beautiful silver finish and black lettering on side of tank.

HO-116 "Sinclair" Tank Car—5¾" long.....\$2.00
Like the "Texaco" car but having the name "Sinclair"—has black finish with white lettering.

BUILD 'EM YOURSELF - Miniature Tru-Model Locomotives and Rolling Stock in Ready-to-assemble KITS

Building these realistic "HO" gauge Tru-Model locomotives, tenders and cars is nearly as much fun as running them afterwards. Actually to see a true-to-life locomotive take shape in your own hands—as you add one part after another—gives you a glorious sense of achievement. And you don't have to be an expert craftsman to follow the easy instructions.

Kits are complete with die cast parts, automatic couplers, paints, brushes, decalcomanias—everything you'll need to build a model that will make you the envy of all your friends. Every section of every locomotive, tender and car is machined, drilled and tapped with flawless precision. No filing or scraping is necessary to make them fit perfectly. Get yourself an "extra bonus" in fun and enjoyment by making your own "HO" train—look over these splendid kits now and decide which ones you want first.

HO-119K "Illinois Central" Flat Car Kit...\$1.50

This kit builds an "Illinois Central" flat car that's right in every detail—and to add to the realism you'll find three extra trucks included to use as a load.

HO-119 "Illinois Central" Flat Car—5 3/4" long\$2.00

Authentically designed and carrying a load of three trucks with wheels, this flat car adds fun and realism to HO gauge freights. Finished in black with white lettering.

HO-121K Baggage and Mail Car Kit.....\$2.25

With this kit you'll be able to build one of the most beautiful miniature cars in the whole HO line. Automatic couplers and lustrous green enamel all included.

HO-121 Baggage and Mail Car—9" long.....\$3.00

Die-cast Tru-model replica Mail and Baggage car. Has 8 wheels on double die-cast trucks, automatic couplers and a beautiful finish of electrically baked green enamel.

HO-122K Passenger Coach Kit.....\$2.25

You'll want to build several of these passenger coaches. They'll make exciting additions to your railroad and they're loads of fun to put together.

HO-122 Passenger Car—9" long.....\$3.00

Striking the keynote of all HO Gauge models, this modern passenger coach is 100% realistic. Has simulated glass in the windows. Has automatic couplers and lustrous green enamel finish.

HO-112K Locomotive and Tender Kit...\$10.00

Contains everything needed to build the authentic N.Y.C. 4-6-4 Hudson type locomotive and tender with remote directional control. Powerful motor attached to engine frame. Operates on A.C. only. See page 42.

HO-112 N.Y.C. Hudson type (4-6-4) Locomotive and Tender—14" long...\$13.00

Powerful accurately scaled die-cast remote directional locomotive with 6 huge drive wheels, lucite headlight. Motor has 20 to 1 gear reduction capable of amazing pulling power. Operates on A.C. only. See page 42.

HO-110K 4 Car Freight Train Kit...\$14.95

Contains everything needed to build powerful die-cast remote directional control engine, tender and cars, making realistic 4 car freight train. Your chance to have a Tru-Model. All die-cast train for only a fraction of what such trains usually cost. Operates on A.C. only. See page 42.

HO-111K 3 Car Passenger Train Kit...\$14.95

Builds a magnificent perfectly scaled miniature passenger train—sensational engine with powerful motor, streamline cars, simulated glass windows and all the refinements of a crack express. Everything included and ready to assemble. Operates on A.C. only. See page 42.

"HO" TRU-MODEL EQUIPMENT

FOR THE FIRST TIME AT POPULAR PRICES..

Because of the high degree of skill and workmanship employed in the creation of "HO" Tru-Model equipment, prices have previously been necessarily high. Today, thanks to improved production methods of the Gilbert Hall of Science, high quality miniature equipment is offered for the first time at popular prices. Vivid realism and exact authenticity is the keynote of each of the perfectly scaled models. When you select American Flyer Tru-Model equipment for your "HO" train, you'll own a miniature railroad system that is unsurpassed in correctness of design and perfection of finish.

"HO" GAUGE THE HOBBYISTS' LINE

HO-258

HO-12

HO-252

HO-254

HO-256

HO-258 Passenger and Freight Station

\$2.95

Tru-Model illuminated station on raised platform with regulation bay window ticket office. Freight section has loading platform with sliding door.

HO-254 Girder Bridge

\$1.50

New — modern — girder type bridge authentically designed and built to correct scale dimensions. Beautifully finished in red and perfect in every detail.

HO-252 Block Signal

\$3.95

Exactly scaled to the fine HO trains it controls, this ladder equipped signal is mounted on a rugged base. An electrically operated shutter turns light red or green.

HO-256 Signal Tower

\$2.95

Your HO roadway will have a new touch of realism when you add this brilliantly colored die-cast signal tower. Stairs lead up to lighted top floor.

HO-12 Tunnel

\$1.00

Realistically colored and solidly constructed this mountain-style 8" tunnel is a picturesque addition to your line. Like other HO equipment it's correctly scaled to trains.
