THE new American Flyer trains enable you to capture the wonder and glory of real railroading in your own home clirice its exciting action with your own day. No other trains are so sensationally realistic because American Flyer—brings you all of First, American Flyer brings you all of First, American Flyer robe looks like real.—because it is authentic 2-mil track—like the track of a real railroad.

dike real—because the smoke is automatically synchronized with train speed.

Third, American Flyers sound like real—because their "choo-choo" sounds change tone and tempo with every change in train speed.

Fourth, American Flyers look like real because they are built to uniform 3-16* scale from real railroad blueprints. Here's more good news! With all these

Here's more good news! With all these exclusive "just like real features," American Flyers cost no more than less realistic trains. Take this catalog with you when to look at trains. Compare American Flyers with ordinary trains. Count the realistic features! See for yourself how much more "just-like-real" action you get for your money with American Flyer.

A. C. GIRBERT

Founder of the Gilbert Holl of Sc

PLAN AND BUILD A MIGHTY RAILROAD EMPIRE WITH American Flyer

The natural goal of every scale model railroader is to have a mighty rail-road empire. Send slook trains clattering over bridges and roaring into a dark tunnel ... hear the muffled noise of their "choo-choos". .. then see the locomotive reappear in a

a dark funnel ... hear the mullied noise of their "choo-choos" ... then see the locomotive reappear in a cloud of smoke Have big freight yards where cars are loaded by realistic automatic equipment — make up trains and hustle them over a maze of tracks to their destination—uncouple carselectrically—unload them

ush button control.

Here is thrilling action, spectacu-

lar drams, never-ending fun! Soright now—why not plan to build s complete American Flyer system? You don't have to do it all at once. Much of the joy of scale model railroading lies in planning ahead and adding new things one by one.

The first step is to pick a partner, boy's Dad is always a fine choice

or your best friend would like to team

The next step is to select a suitable the best spots. Tables about 30" high make an ideal foundation for spare lumber or plywood.

Thanks to the fact that American

and complete system can be laid out in itself is a very practical reason

The minimum track diameter required for American Flyer is only 40", so that your table need not be over 46" wide. However, a table width of 5 or 6 feet better allows

Your first layout can very well be about 6 x 10 feet. In such space you can lay sufficient track for operating room for equipment. From this you layout such as illustrated or to a walls. See track layouts on pages ing your system is given in the InMake your System Grow . . . Month after Month . . . Year after Year start with a single loop-and keep adding track, switches and crossings until you have

the scale model railroad of your dreams

Only American Flyer Has Just-Like-Real Smoke and "Choo-Choo" Sounds

ASK THESE 10 QUESTIONS When you choose a Scale Model Railroad

Take this catalog with you when you look at electric trains. See how many

more "just like real" features American Flyer gives you.					
QUESTION	AMERICAN FLYER	WHY THIS IS IMPORTANT			
1. Is track realistic 2-rail "T" type?	YES	Most electric train sets have 3-rail track—the middle ra- being used to carry the current. This makes them loo- like "toy" systems—because no real railroad uses suc- track. American Flyer has authentic 2-rail "T" track the looks like the track of a real railroad.			
2. Does locomotive puff real smoke synchronized with train speed?	YES	To be just like real, smoke should increase and decreas with every change in train speed. Only American Flyer puff smoke this way.			
3. Does locomotive repro-	YES	No locomotive seems like real unless it sounds like real			

American Flyer Track Layouts The fun and realism of operating a scale model railroad

Every American Flyer train set includes enough track

to start your railroad system. But think of the glory of owning a system with double loops, several sidings. crossings and switches. Look at the layouts on this page and the next. Imagine several trains tearing down the straight-aways—crawling into sidings—and performing Why not add a certain number of track sections each

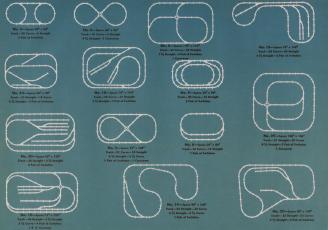

month? See how rapidly your system will grow into the units, switches and train controls are described on page 31. Extra cars and American Flyer equipment will complete your system's realism. See pages 32, 33, 34 and 35.

125 AWARDS WORTH OVER 2,000.00 FOR ERECTOR BOY ENGINEERS

HELLO BOYS! It's fun to build spectacular engineering models with Erector.

But that's not all, It's fun that can bring you fame and a big award. . . . Each year the Gilbert Hall of Science offers awards with a total value of over \$2,000.00 for best original models made with Erector. In addition to the award, each winner receives a handsome Award Certificate suitable for framing. And every boy or girl who submits an entry receives a Diploma of Merit.
