300,000 'Swamps' Are His Creation

NEW HAVEN, Conn. (UPI)
—Most people can take swamps, or leave them alone. But Paul Koch is a swamp-lover who will help make more than 300,000 this year.

Koch specifies and purchases the materials that go into a protozoa growth chamber made here by The A. C. Gilbert Co. Children buy them as part of a microscope set, and just add water for "instant swamps" to grow their own harmless specimens.
