New Products.

(By the Associated Press.)

A new type of flower pot with hollow walls to hold water makes it possible for owners to leave home confident their prized plants will have a 30-day water supply, it's claimed. It is the "aquamatic planter," a square pot of plastic. Its walls can be filled with water from a re-closable inlet on top. The flow of water is vacuum-controlled, with the plant drawing only as much water as is necessary, according to the dealer, Frank R. Parsons of Sutton, Mass.

Another time for gardeners comes from Heritage House Products Inc., Pittsburgh, Pa., in the form of a new organic mulch called "wonder mulch." It consists chiefly of corn cobs ground to uniform size and turned into a brown color which will not fade and become unsightly. It decomposes to enrich the soil and is wettable, therefore it will not flow away during rain or watering. It's recommended to protect plants against extremes of temperature and excessive evaporation.

A new adhesive is said to do a quick and effective job in binding rubber or fabric to metal, wood, canvas or other materials. Called Devcon Trim cement, it is described as fast-setting, permanently flexible, and unaffected by heat, cold, or moisture. Offered by Devcon Corp., Danvers, Mass., it's suggested for loose weather stripping and insulation, sliding floor mats, torn convertible tops, leaking radiator hoses, loose handles, and other jobs.

A. C. Gilbert Co., New Haven, Conn., offers a new look for its Erector sets on its 50th anniversary — multi-colored steel panels, plastic domes, windshields and an elongated teardrop design in girders. Also offered is the "wing thing" which has a 52-inch wing span, is powered by a small gasoline engine and continues to sweep and glide even after the engine runs out of fuel. It can be flown in calm or strong winds, the company says.

Ronson Corp., Woodbridge, N. J., offers its new "Escort" portable electric hair dryer which it says is the only one on the market which has comb and brush drying attachments in addition to a hood. It is also claimed to be the lightest portable hair dryer, weighing 40 ounces. Four temperature ranges may be dialed.
